Application No. 10/575,367

Art Unit: 3725

Amendment under 37 CFR §1.116

Attorney Docket No.: 062402

**AMENDMENTS TO THE CLAIMS** 

The following listing of claims will replace all prior versions of claims in the application:

**Listing of Claims:** 

1. (Currently amended): A security paper comprising at least two fibrous paper plies,

wherein each of said plies is a material layer having a fibrous structure comprising fibers,

the first ply being an external ply that includes a first authentication element provided

within a region of non-zero thickness of the first ply, said first authentication element comprising

at least one of (i) authentication particles, and (ii) authentication fibers different from the fibers

of the fibrous structure of the first ply, said first authentication element of the first ply being

substantially absent from the second ply, and

the other ply, the second ply, comprising a second authentication element provided

within an area of non-zero thickness of the second ply, said second authentication element

comprising at least one of (i) authentication particles, and (ii) authentication fibers different from

the fibers of the fibrous structure of the second ply,

wherein each of said first and second authentication elements is selected from the group

consisting of iridescent particles, luminescent fibers, luminescent particles, fluorescent fibers,

fluorescent particles, phosphorescent fibers, phosphorescent particles, colored fibers, colored

particles, thermochromic fibers, thermochromic particles, fibers that react to electromagnetic

fields, particles that react to electromagnetic fields, and mixtures thereof,

and wherein the second authentication element of the second ply is substantially absent

from the first ply.

Application No. 10/575,367 Art Unit: 3725 Amendment under 37 CFR §1.116 Attorney Docket No.: **062402** 

2-3. (Canceled)

4. (Previously presented): The security paper as claimed in claim 1, wherein the second

authentication element of the second ply can be detected optically.

5-8. (Canceled)

9. (Previously presented): The security paper as claimed in claim 1, wherein said second

ply comprises a reinforcing element, and said reinforcing element also has an authentication

function.

10. (Previously presented): The security paper as claimed in claim 9, wherein said

reinforcing element constitutes said second authentication element of said second ply.

11. (Canceled)

12. (Previously presented): The security paper as claimed in claim 1, wherein the fibers

of the fiber structures of the plies are cotton fibers.

- 3 -

Amendment under 37 CFR §1.116 Attorney Docket No.: **062402** 

Application No. 10/575,367

Art Unit: 3725

13. (Currently amended): The security paper as claimed in claim 1, which comprises a third ply having a reinforcing element, wherein the third ply is central and the second ply is

another external ply. (original, renaming third as second)

14. (Previously presented): The security paper as claimed in claim 1, which is a

banknote paper.

15. (Previously presented): The security paper as claimed in claim 1, wherein said plies

have been assembled wet.

16. (Previously presented): A process for manufacturing a security paper as claimed in

claim 1, comprising assembling said plies wet.

17. (Previously presented): The security paper as claimed in claim 1, wherein at least

one of said first and second authentication element is chosen from substances that react to

electromagnetic fields of the microwave type.

18-22. (Canceled)

23. (Previously presented): The security paper as claimed in claim 1, wherein at least one

of the first and second authentication elements comprises flakes.

-4-

Amendment under 37 CFR §1.116 Attorney Docket No.: 062402

Application No. 10/575,367 Art Unit: 3725

24. (Canceled)

25. (Previously presented): A security paper comprising at least two fibrous paper plies,

wherein each of said plies is a material layer having a fibrous structure comprising fibers,

the first ply being an external ply that includes a first authentication element provided

within a region of non-zero thickness of the first ply, said first authentication element being a

watermark, said first authentication element of the first ply being substantially absent from the

other ply, and

the other ply, the second ply, comprising a reinforcing element substantially absent from

the first ply, said reinforcing element being fibers different from the fibers of the fibrous

structure of the second ply, said reinforcing element being selected from the group consisting of

synthetic fibers, natural textile fibers, and mixtures thereof,

wherein the reinforcing element is such that the paper has a mechanical strength higher

than a mechanical strength of a paper having identical weight in g/m<sup>2</sup> and identical composition

except without the reinforcing element.

26. (Previously presented): The security paper as claimed in claim 25, wherein the

reinforcing element is chosen from polyester fibers, polyamide fibers, abaca, hemp, flax,

Chinook fibers, and mixtures thereof.

- 5 -

Application No. 10/575,367 Amendment under 37 CFR §1.116 Art Unit: 3725 Attorney Docket No.: 062402

27. (Previously presented): The security paper as claimed in claim 25, wherein the reinforcing element is chosen from polyester fibers, said polyester fibers are polyethylene

terephthalate fibers, and said polyester fibers are present in an amount of between 10 and 20

parts by dry weight per 100 parts of the other fibers of said second ply.

28. (Previously presented): The security paper as claimed in claim 25, wherein the

second ply comprises a second authentication element.

29. (Previously presented) The security paper as claimed in claim 28, wherein said

second authentication element is selected from the group consisting of iridescent particles,

luminescent fibers, luminescent particles, fluorescent fibers, fluorescent particles,

phosphorescent fibers, phosphorescent particles, colored fibers, colored particles, thermochromic

fibers, thermochromic particles, fibers that react to electromagnetic fields, particles that react to

electromagnetic fields, and mixtures thereof.

30. (Previously presented): The security paper as claimed in claim 25, wherein said

external first ply has a thickness substantially greater than that of said second ply.

31. (Previously presented): The security paper as claimed in claim 25, wherein said

reinforcing element also has an authentication function.

- 6 -

Application No. 10/575,367 Amendment under 37 CFR §1.116
Art Unit: 3725 Attorney Docket No.: 062402

32. (Previously presented): The security paper as claimed in claim 25, wherein said

security paper has a tear index of 10 mN.m<sup>2</sup>/g or higher.

33. (Previously presented): The security paper as claimed in claim 25, wherein the fibers

of the fiber structures of the plies are cotton fibers.

34. (Previously presented): The security paper as claimed in claim 25, which comprises a

third ply having an authentication element, wherein the second ply is central and the third ply is

another external ply.

35. (Previously presented): The security paper as claimed in claim 25, which is a

banknote paper.

36. (Previously presented): The security paper as claimed in claim 25, wherein said plies

have been assembled wet.

37. (Previously presented): The security paper as claimed in claim 36, wherein said

external first ply including the watermark has been formed on a cylinder-mold machine that

includes a watermark wire.

- 7 -

Application No. 10/575,367 Amendment under 37 CFR §1.116 Art Unit: 3725 Attorney Docket No.: 062402

38. (Previously presented): A process for manufacturing a security paper as claimed in

claim 25, comprising assembling said plies wet.

39. (Previously presented): The process for manufacturing a security paper as claimed in

claim 38, wherein said external first ply including the watermark is formed on a cylinder-mold

machine that includes a watermark wire.
